

RODA[®] lac CAB dull - Aqueous CAB emulsion

Product properties	<p>Top coats prepared with RODA[®] lac CAB dull provide the following properties:</p> <ul style="list-style-type: none">• No yellowing when exposed to light, amines or heat;• Good wet/dry rub fastness and with alkaline substances;• Good migration fastness;• Good wet/dry adhesion;• Good resistance to hot ironing and embossing;• Natural appearance;• Good dry milling behaviour when the coat is not too thick. <p>RODA[®] lac CAB dull is particularly suitable for white leather, pastel shades and garment leather when good resistance to migration is required. The degree of gloss can be adjusted with RODA[®] lac CAB gloss.</p>
Application	<p>For top coats, RODA[®] lac CAB gloss is applied by spray guns diluted 2:1 with water; for intermediate coats 1:1 with water. The compatibility with other products such as touch modifiers or liquid dyes should always be tested carefully before usage.</p>
Chemical nature	<p>Formulated by CAB, plasticizers and matting agents in water emulsion</p>
Appearance	<p>White opaque viscous liquid</p>
solids	<p>13,0-15,0%</p>
pH	<p>8,0-9,0</p>
Charge	<p>Anionic</p>
Storage	<p>The product can be stored in its original packaging between 5°C and 40°C for 9 months.</p>
Safety	<p>For safety information see the safety data sheet</p>
